

Experiences with employment

I have experience working at the Children's Museum working with children as play guide. The...picture is at art studio. There are chairs and tables and colorful chairs and pictures, and drawing on the walls. At a lot of the stations we have like different bins that ... paper or color paper or straws or different bins that like each different, like arts and craft stuff that children and make stuff with...I love art. I love to make arts and crafts...I love that we can be creative with kids and we can just express ourself. We was making a special Valentine's heart for they family or for theyself. That particular day, you know, I loved it.

Aspirations

I can see myself working in a daycare or running my own daycare because I love working with children. I would like to have my own daycare with helping parents seek childcare because a lot of parents is looking for a lot of childcare. So I want to be helpful to, you know, make that happen.

What do I need to do to accomplish my goal?

If I wanna run a childcare business or have my own childcare, I have to have a first aid, CPR certification and fire safety. You have to have one year of early childhood education certification, um, in the credit college and university for at least for at least 30 semester hours and six months of age appropriate [experiences].
